

What is ZerixText®

Efficient transfer of information via text

ZerixText is a powerful communications tool that lets you broadcast SMS messages from your computer to a mobile phone or any device that receives SMS data. It can be used by any and every business for text alerts, marketing & promotions, customer service, billing, administration, logistics and support.

Simplify everything

ZerixText simplifies communication. It comes with an auto-messaging and reply function with a built-in database for you to store information, ready for sending. Your targets get **accurate, up-to-date info on demand**, through both **text and e-mail**.

Take it easy with Zerix

User friendly & easy to install. Email, chats and social media messages can easily get ignored. ZerixText ensures that everyone gets the information on time.

Did you know?

ZerixText is an essential tool for your business. It keeps records of all incoming and outgoing text messages.

Get closer to your customers, inform them of your latest products, get their feedback and provide timely support. Keep your staff well-informed via text updates. Improve your response rates to important text inquiries.

But wait,
there's more!
